Problem solving and critical thinking refers to the ability to use knowledge, facts, and data to effectively solve problems. This doesn't mean you need to have an immediate answer, it means you have to be able to think on your feet, assess problems and find solutions. The ability to develop a well thought out solution within a reasonable time frame, however, is a skill that employers value ...

Using Case Studies to Teach. Why Use Cases? Many students are more inductive than deductive reasoners, which means that they learn better from examples than from logical development starting with basic principles. The use of case studies can therefore be a very effective classroom technique. Case studies are have long been used in business schools, law schools, medical schools and the social ...

One of my favorite things about marketing case studies is that they generally have the same logical structure: problem, solution, results. Companies may have different names for these (or sometimes use headlines instead), but the formula is the same and is endlessly repeatable. In this post, I will discuss this classic structure and how you...
