Since 1956 ISO Certified Metal Cutting Service has been providing top quality notch, shape and cutoff sawing services from our 32,000 square foot facility in the City of Industry, CA. MCS ISO certified metal cutting experts serve many industries requiring the equipment capabilities and material industry expertise that allows them to optimize their material usage.

[sawing machine | Description & Facts | Britannica](#)

Most joint sawing is done using industrial diamonds as the primary abrasion element. Diamond tipped blades will generate high amounts of heat when cutting and generally must be cooled by water to prevent the saw blade metal from overheating and melting. Water also prevents dust formation during sawing. Abrasive Blades. Dry sawing uses abrasive blades that are usually made from fiber reinforced ...
